Merino wool properties

Merino wool is soft, light and has a good thermal insulation, a good wind protection and the best moisture management.

THERMAL COMFORT

0°C / 24°C

32°F / 76°F

In contrast to synthetics, Merino is an active fibre that reacts to changes in body temperature.

So it helps you stay warm when the weather is cold, and cool when the weather is hot.

Natural elasticity helps Merino wool garments stretch with you, yet return to their original shape.

So Merino wool clothing is ideal to wear when exercising.

Merino wool is much better at protecting you from UV radiation than most synthetics and cotton. So the whole family will be safer wearing it on sunny days.

Chaskee EU production

Chaskee's european production is committed for :

- no discrimination in employment
- no exploitation of child labour
- payment of a fair living wage
- no excessive working hours
- safe and healthy working conditions
- keeping the jobs in Europe
